step by step

## Deep Waver

**FOR BEST RESULTS USE**

**HOT TOOLS® DEEP WAVER MODEL # 2179**

CeramicTi provides far infrared heat and excellent durability under high heats creating beautiful soft, shiny deep waves on all hair types.

### STEP 1

On pre dried hair, start at the top of the head and using horseshoe sections around the head pre-section the hair all the way down to the hairline.

### STEP 2

Release the first section and comb out hair thoroughly, making sure you don't have any snarls or tangles.

### STEP 3

Beginning as near to the scalp as possible placing ½ inch thick section in the iron, clamp and hold for 5 seconds.

**STEP 4**

Release the clamp and move the iron down the section of hair equal to the width of the iron.

**STEP 5**

Release the next pre-sectioned hair and repeat.

**STEP 6**

Continue in this fashion all the way up the head to the top.

**STEP 7**

Run your fingers through the wave formations to add definition and volume.

**TIPS FROM THE PROS**  
Spray your hair with a light hairspray before and after use of iron to keep long-lasting waves.
